- (c) the employment of staff in the laboratory.

Page 6 – Applicant details

Renewal applications should include detail of approved pathology practitioner number. An alternative contact person, available to assist with administrative matters relating to your application, may be provided if convenient.

Page 6 – Current medical practitioner registration

Detail on current medical registration, including registration number and expiry date is required.

Page 7 – Professional qualifications

An applicant seeking renewal as an approved pathology practitioner is not required to supply qualifications already provided in previous applications. If a new qualification has been attained, detail on this would be appreciated.

A new applicant (not holding section 23DC approval as a pathology practitioner at time of application) will need to detail all professional qualifications.

Approval of an applicant to become an approved pathology practitioner (APP), according to section 23DC of the *Health Insurance Act 1973* (the Act), requires the Minister (or delegate) to satisfy themselves that an applicant is 'a fit and proper person' – subsection 23DC(5) of the Act.

In determining if a person is fit and proper a delegate will review, amongst other matters, the person's formal qualifications and experience – subsection 23DC(6)(a) of the Act.

Qualifications recognised as acceptable include those detailed by the National Specialist Qualifications Advisory Committee – set out below is the list of qualifications.

Where a new applicant – being people who do not hold acceptance as an APP – does not hold a qualification listed below, a delegate will need to give further consideration to qualifications and experience. In doing this, the applicant may be asked to provide details to the Royal College of Pathologists of Australasia (RCPA). The RCPA will then advise the delegate regarding the applicants qualifications and experience.

Medicare Australia and the RCPA have established a form designed to collect the necessary information for consideration of new applicant's qualifications and experience. The form is provided to new APP applicants at the time of their application.

Page 7 - Laboratory details

An applicant must provide detail of each laboratory where pathology services will be performed.

Page 8– Agreement, arrangement and contract

Where an applicant is not the proprietor of a laboratory detailed on page eight, the applicant must ensure a current agreement, arrangement or contract exists with the laboratory proprietor and is available on request by Medicare Australia. The agreement, arrangement or contract does not need to be submitted with your application.

A person may become a 'relevant person' for many reasons, including breach and alleged breach of undertaking or, on conviction of a 'relevant offence' – which is also defined at section 23DA.

The questions seek to identify notices or convictions served on the applicant or other persons in an employee, business or financial relationship with the applicant. The existence of which will render them a 'relevant person' and further detail will be required.
